

# ITNRides 2.0

## Updates and Improvements

### Enhancements

- New button on the Driver record: “Manifest Send 2 Days Out” is now working properly.
- All Contacts that had a first name of “NULL” have been cleaned and replaced with a blank. These were typically organizations that have no first name.

### Bug Fixes

- There was a bug on assigning rides that were scheduled early in the morning, like a 6am ride, that prevented a driver from being assigned to the ride. This bug has been fixed.
- Several issues with online payments have been fixed. The back-end processing is now all correct and recurring donations have also been fixed. Failed payments still present to the user as successful – a fix to this is being worked on now – but the transactions do not post.
- Rides that were cancelled but charged as short notice and no shows, were not having TAI’s calculated correctly. This has been fixed.

### Reports

- Recurring Ride Report - Removed site filter and added the following fields - Ride Date, Ride Status, Origination, Destination and grouped them by Recurring Rides Number. Added a relative filter for the Ride Date - "equal to or greater than TODAY," which can be changed.

### Access to ITNRides 1.5

*For those who transitioned to ITNRides 2.0 from ITNRides 1.5- Online access to the ITNRides 1.5 servers will be disabled as of December 15th. Download any historical reports you may want now!*
